# KEVIN CENI

## Full-Stack Developer for Clinical and Biomedical Software

@ kevinceni@gmail.com  Uster, SWITZERLAND  kevinceni.ch  in kevinceni
kevinceni_wildlife

## SUMMARY

Full-stack developer with about six years of professional experience in TypeScript (React, Node.js) and Python, building and running data-intensive web platforms for hospital and biomedical research. At the Inselspital I work daily with DICOM data, clinical system integration and patient-data protection requirements; before that I led the frontend of a research platform at IRB. Dual background in Computer Engineering (BSc) and Biomedical Engineering (MSc). Currently preparing the AWS Certified Cloud Practitioner exam.

## WORK EXPERIENCE

### Full Stack Developer - Focus Frontend

**Inselspital - Neuroradiology**

10/2022 - Present  Bern

- Designed and developed responsive data-driven interfaces for the Medical Blocks Platform using React, GraphQL, and Node.js, enabling efficient exploration and analysis of medical imaging datasets.
- Architected frontend components and UI workflows for complex visualization tools used in biomedical research.
- Collaborated with backend teams to integrate APIs and optimize data flow for performance and usability.
- Containerized and developed Python-based services and AI/ML pipelines with Docker and integrated them into the platform.
- Built a Random Forest classifier that labels MRI and CT scans by sequence type from DICOM metadata, applied to real clinical data.
- Leveraged AI-assisted development tools (LLM-based) for prototyping, refactoring, and documentation within approved data-handling boundaries.

### Full Stack Developer - Focus Frontend

**Institute for Research in Biomedicine - Infection and Immunity**

05/2020 - 06/2022  Bellinzona

- Led frontend development of the Immunemap Platform, building scalable Angular interfaces for visualization and analysis of microscopy video data.
- Implemented interactive UI tools for tracking and exploring biological cell behavior in large datasets.
- Built and ran CI/CD pipelines with Azure DevOps for the platform's build, test and deployment process.

## LANGUAGES

- **Italian (Native)** ●●●●●
- **English (B2+)** ●●●●○
- **German (B2)** ●●●●○
- **French (B1)** ●●●○○

## SKILLS

Typescript | React | Node.js | Python | FastAPI | REST API | GraphQL | SQL | Docker | Nginx | Javascript | HTML | CSS | Redux | Jest | DICOM / PACS | Java | Spring Boot | Angular | PyTorch | PHP | Symfony | BabylonJS | CI/CD | Azure DevOps

AI-Assisted Development | Agentic Workflows | Prompt Engineering

Visual Studio Code | Github | Jira | Unix | Mac OS | Windows | Lightroom | Photoshop | Final Cut Pro

Client Communication | Teamwork | Analytical Thinking | Problem Solving | Creativity | Reliability | Initiative | Attention to Detail | Adaptability

# EDUCATION

## Master

**University of Bern**

09/2017 – 03/2020 Bern

- **Master of Science** in Biomedical Engineering with specialization in Image-Guided Therapy
- Thesis: "Augmentation of Optical Coherence Tomography Biomarker detection with sparse labels" - The aim of this project was to train a convolutional neural network which is able to classify and locate several biological markers in the eye to help clinicians to diagnostic eye's related diseases.

## Bachelor

**SUPSI - Scuola universitaria professionale della Svizzera italiana**

09/2012 – 07/2016 Manno

- **Bachelor of Science** in Computer Engineering
- Thesis: "2D & 3D image processing for industrial application" - The aim of this project was to build an application able to recognize a device and detect if it was mounted correctly on a rotating table.

## Apprenticeship

**Swisscom SA**

09/2008 – 06/2012 Bellinzona

- **Federal Diploma** of Vocational Education and Training as Mediamatic with Technical High School Diploma
- Provided IT assistance, troubleshooting, and user support for staff and students, ensuring reliable system functionality.
- Assisted human resources operations and prepared technical documentation and materials required by field technicians.
- Delivered customer support for home technology products (TV, internet and mobile services), resolving technical issues and guiding users through solutions.
- Thesis: "Configuration of Notebooks" - The aim of this project was to give to students a simplified and partially automated process for the installation and first setup of their notebooks.

# PERSONAL PROJECTS

## Website - kevinceni.ch

Developed and maintained a personal website to strengthen my skills in TypeScript and Java Spring Boot. Built a responsive frontend and implemented backend services featuring JPA-based database integration, as well as authentication and authorization mechanisms.

## AI Agent – Autonomous Social Media Automation

**Personal Project**

2025 – Present

Designed and built an autonomous agent to manage a wildlife photography Instagram account. The agent monitors a folder for new shots, generates fitting captions using Claude's image analysis (Vision), and publishes posts automatically. A Next.js interface enables reviewing, manually editing, and regenerating content before approval. Focus areas: agentic workflows, LLM integration, prompt engineering, and external API integration.

# CERTIFICATES

**Cambridge First Certificate (FCE)**
Language course in Dublin, Ireland
(02/2017 - 06/2017)
B2

**Test Deutsch als Fremdsprache (TestDaF)**
Language course in Münster, Germany
(10/2016 - 02/2017)
B2+

**Swiss Mediamatic's Thesis**
9th Position at the best Mediamatic's Thesis in Switzerland (2012)

# PERSONAL INTERESTS

Photography | Video editing | Birdwatching | Hiking | Kayaking | Drawing | Cycling
